Translation of OpenSolaris

Aleš Černošek, Jan Lána
EMEA Globalization Center
Sun Microsystems

Agenda

- Introduction
- OpenSolaris and Locale Data Objects
- DEMO: Creating a new locale
- Translation of OpenSolaris

Agenda

- Introduction
- OpenSolaris and Locale Data Objects
- DEMO: Creating a new locale
- Translation of OpenSolaris

Software Globalization Today

internationalization (i18n):

- the process of designing software so that it can be adapted (localized) to various languages and regions

- preparing software application for global market

localization (l10n):

- is a process of adapting software for specific languages and regions

- translation of software resources

globalization (g11n):

- internationalization + localization

OpenSolaris Locale Support

- ## What is Locale?

  - library containing data specific to each language and territory (date, time formats, sorting rules, currency…) - e.g. de_DE.UTF-8

  - Utilities, functions change their behavior according to current locale setup

  - *locale; locale -ck LC_ALL; localedef; ...*

- ## Why is it important?

  - Basic component for internationalizing applications, including application translations, …

  - Developer/User – no need to take care of locale customs, data

- ## Data Source

  - CLDR project (Unicode consortium): http://cldr.unicode.org

  - Ensures the latest data; ver. 1.7.1 (OSo build 125)

Locale Coverage in OpenSolaris

OpenSolaris 2008.05 has visited 33% of the countries in the world!

OpenSolaris 2010.02 has visited 47% of the countries in the world!

Locale Coverage in OpenSolaris

Approach

- new locales based on UTF-8 only
  SUNWlang-XX{aa}

- sustain non-UTF-8 based locales
  (IPS repo)
  SUNWlang-XX-extra

- **enable to create/modify locale
  and contribute back to
  OpenSolaris**

Coverage

- ~ 50% of all countries
- 80% of population

version	# UTF-8	# non-UTF-8
S9 UR8	37	162
S10 FCS	41	166
OS 2008.05	93 (17)	126
OS 2009.06	101 (17)	126
OS 2010.03 (b125)	~50 (117)?	126

New Locale Creation – is it difficult?

S10

SXCE

OSo

New Locale Creation Process in OpenSolaris

Requirements

- sstudio (cc); ant; gmake; hg
- [local IPS server]
- g11n-locale WS

Process

- IN:
  spec – locale spec. files (./locale dir)

- OUT:
  SUNWlang-XX pkg (IPS repo)

DEMO: How to Create New Locale in 5 minutes?

DEMO: Creation of oc_FR.UTF-8 locale

Requirements:

- pfexec pkg install SUNWmercurial SUNWgmake SUNWant sunstudio

- export CC=/opt/sunstudio12.1/bin/cc

- pfexec svccfg -s application/pkg/server setprop
       pkg/inst_root=/export/home/tester/repository
       pkg/port=10000
  IPS server configuration

- pfexec svcadm [enable|restart] pkg/server - IPS server enable/startup

Clone G11n locale repository:

- hg clone ssh://anon@hg.opensolaris.org/hg/nv-g11n/locale

Create a new spec. file:

- touch ./locale/oc_FR.UTF-8.spec

Build:

- gmake – creates all existing locales (for locale/*)

- gmake PKG_REPO=http://localhost:80 PKGS=SUNWlang-xx **ips**

- **gmake ips**

10

DEMO: Changing the currency for oc_FR.UTF-8

Modify spec. file:

- cat ./locale/oc_FR.UTF-8.spec

  cldr_variant   oc_FR@currency=FRF
  pkg_name   this_is_my_package

Build:

- **gmake** PKG_REPO=http://localhost:80 **ips**
- **gmake doc** - see ./build/report_diff.html

11

Translation of OpenSolaris

Translation of OpenSolaris

- ## Our Focus
  - SW components
  - Documentation
  - Help pages
  - Wikis (e.g. opensolaris.org) and other materials (like Newsletters, etc.)

- ## Expectations ('Ideal' process)
  - Easy to access, easy to start
  - Focus on Translation, not to deal with technical aspects (file formats, integration date, …)
  - Ensure good quality and translation consistency
  - Possibility to test translations before delivery into WS

CTI - http(s)://translate.sun.com/cti

OS.o L10n Teams

http://www.opensolaris.org/os/community/int_localization/

- 27 l10n groups under l10n/i18n OSo community

- Arabic, Bulgarian, Catalan, Traditional & Simplifies Chinese, Czech, Dutch, French, German, Greek, Hungarian, Indian, Indonesian, Italian, Japanese, Korean, Malayalam, Polish, Brazilian, Russian, Slovak, Spanish, Serbian, Tamil, Turkish, Vietnamese

- 10 'supported' languages by Sun

| Area	OS2009.06	OS2008.11	OS2008.05
# New languages	19	15	11
# Contributors	46	10	0
# Open CTI Projects	10	3	0
# Open Languages	20	5	1

What next?

Future

- Improve **Quality** of Translations
  - tools
  - community education
- Improve CTI usability and features
- Try to increase the number of contributors
- Different content than SW messages and OLH
  - Documentation
  - Wiki content
    (e.g. Auth. module for OS.org sites)

Announcement

Sun OpenCTI

http(s)://translate.sun.com/opencti

- starting 11/2009 (**Beta**)

- based on OpenCTI project (http://kenail.com/projects/cti)

- developed by student team (local Technical University)

18

Sun OpenCTI

CTI -vs- Sun OpenCTI

- Operating on the same data (user accounts, translation projects)

- New Sun OpenCTI provides more & enhanced features
    - Fuzzy matches
    - Terminology & Glossary available
    - New Glossary terms /Changes proposals
    - Project Infrastructure (Bug Tracking, Discussion forums, ...)
    - Possibility to contribute back to editor
    - ...
